

Fan-tailed Warbler (*Basileuterus lachrymosa*), Granite Reef, Maricopa County

This Fan-tailed Warbler was photographed by Brian Johnson and Jim Burns on 13 November 2022

Originally found by Torin Waters. This will represent a 12th Arizona record, and a first record for Maricopa County.

Almost all other Arizona records are from late spring and summer, this representing by far the latest record in the state.
