

Yellow-throated Warbler (*Setophaga dominica*), Lower Miller Canyon , Cochise County

This Yellow-throated Warbler was photographed by Christie Van Cleve on 09 July 2022.

Yellow-throated Warbler is a casual spring and summer visitor to Arizona, with more than 30 total records for the state.

Unmistakeable, with bright yellow throat, and distinctive black-and-white face pattern, unlike a Grace's Warbler, which lacks the white eyebrow.:
